

Festus Ishioma Omorowa

Full-Stack Developer | System Architect

festechdev@gmail.com • linkedin.com/in/festus-ishioma-2785621a7 • festus-portfolio-mocha.vercel.app

Executive Summary

Strategic Full-Stack Developer dedicated to engineering end-to-end web applications that solve complex business challenges. With deep expertise in **Golang**, **TypeScript**, and **Next.js**, I bridge the gap between intuitive user interfaces and scalable, high-performance backend systems. I approach development with a rigorous emphasis on clean architecture and system design, helping organizations transform vision into reliable, production-ready technology.

Core Competencies

■ Technical Excellence

Golang, TypeScript, React, Next.js, REST & GraphQL, WebSockets, PostgreSQL, MSSQL, GORM, Docker, Vercel, Git.

■ Strategic Planning

System Architecture, Scalability Planning, API Automation (Webhooks), Performance Optimization, Product Thinking.

■ Execution & Delivery

TDD (Test-Driven Development), Code Refactoring, Agile Methodologies, Technical Documentation, Stakeholder Alignment.

Professional Experience

Full-Stack Developer

Compulectro Info Tech • May 2025 – Present

- Architected a state-wide health insurance platform (**Abshia**) using Go and MSSQL, streamlining claims and enrollment for multiple stakeholders.
- Developed a proprietary face recognition system (**Facer**), reducing manual validation time by **60%** through secure identity automation.
- Led system design across the product suite, eliminating operational bottlenecks and enhancing reliability.

Full-Stack Developer

Telkita Portal • 2025

- Built a comprehensive developer management platform from scratch, integrating real-time project tracking and onboarding.
- Boosted team efficiency by **40%** through the implementation of real-time collaboration features.
- Engineered a modular architecture that accelerated feature rollout and reduced debugging time by **30%**.

Backend Developer (Golang)

Longswipe (Fintech) • 2024

- Developed core backend infrastructure for a voucher gifting platform, ensuring high-integrity transaction processing.
- Optimized high-volume APIs, significantly reducing failure rates under peak load.
- Integrated third-party payment gateways to facilitate seamless automated service delivery.

Education

Bachelor of Science (B.Sc.), Political Science

Delta State University
